FRIEDHELM LOH GROUP

Rittal's flexible, robust solutions are designed to protect your systems

Rittal's AX and KX stainless steel enclosures are your dependable allies for optimum system protection. The AX series offers versatile protection from various external influences such as dust and humidity, and its flexible design means it adapts readily to a range of applications. For example, the wider door space with perforated door strips creates additional storage space while also boosting efficiency.

The KX terminal box series and KX E-Box series offer additional options to accommodate various applications. The KX terminal box series is a closed empty housing with cover and quick-release fasteners, while the KX E-Box series provides a closed variant with door and hinges. The KX bus enclosure series is an alternative option.

These enclosures are ideal for protecting and organising your valuable components in challenging environments, be it industrial installations, control units or other applications where reliable storage is paramount.

Joining forces to add value

Powerful partners Eplan and Rittal have a shared philosophy: To make complex things simple. Our solutions speed up your processes and boost your productivity. We optimise and industrialise every stage in your value chain and across the entire process – from design, planning and engineering, procurement and manufacturing through to operation and IT. With our help, you can triumph in the industrial transformation to the new Industry 4.0 standard.

Our goal:

Yesterday, we devised the solutions our customers will need tomorrow, and are already stocking them today.

Rittal and Eplan. Your partners for the future.

We think in terms of your processes.

Operations

Manufacturing

RiPanel – your cutting-edge tool for straightforward enclosure system configuration. Effortlessly meet individual requirements with RiPanel. Below you will find an overview of all functions.

- Effortlessly select a matching enclosure system with the user-friendly interface
- Plausibility-checked, error-free selection of accessories with direct positioning in a realistic 3D view
- Add customer-specific cut-outs and import CAD data for precise renderings
- Automatically generate technical data for uncomplicated enquiries and orders

Discover RiPanel's efficiency and precision and optimise your enclosure configurations today.

Your benefits

- Save time with simple configuration and ordering processes
- Avoid errors when selecting and machining accessories
- Enhance your planning with a concurrent parts list and transparent price display
- Accelerate processes with integrated interfaces to Eplan and Rittal software

Rittal ePOCKET

Streamline your processes and maintenance operations with Rittal ePOCKET – your digital wiring plan pocket for efficient plant documentation.

Design and documentation:

- Fast, reliable documentation is available for all project participants
- Digital processes from wiring plan generation to the Rittal ePOCKET for immediate availability
- Fast change management with the integrated EPLAN eVIEW workflow
- Save on printing costs and minimise your carbon footprint
- Up-to-date data is available to all project participants

Service and maintenance:

- Save time on maintenance and repairs by rapidly locating the information you need
- Faster troubleshooting through simple pinpointing of the correct enclosure on site
- Reduced plant downtime and maintenance costs
- Correct documentation reduces the risk of error
- Minimised risk of fire (because no paper is stored inside the enclosure)
- Up-to-date data is available to all project participants
- Continuous tracking of changes by the maintenance engineers

Compact enclosures AX

Stainless steel

The AX stainless steel enclosure from Rittal represents significant progress in enclosure manufacturing. This high-quality stainless steel (1.4301 or 1.4404) enclosure delivers unprecedented robustness and resilience. Its smooth surface is easy to clean while ensuring maximum protection for sensitive components.

The AX stainless steel enclosure adapts to your individual requirements. Whether you are looking to protect high-quality components or streamline your interior installation and maintenance, this enclosure guarantees flexibility without compromising on safety.

Discover how the AX stainless steel enclosure can exceed your expectations and shape the future of enclosure manufacturing.

Interior installation flexibility

Integrated locators in the housing enable the precise, time-saving incorporation of the interior installation rails used to fit out enclosures with punched sections with mounting flanges and accessories from Rittal.

Interior installation reliability

The continuous pattern of locators is extremely flexible and the interior installation rail can be fitted in the enclosure without drilling, even retrospectively.

Security

The deliberately slimline enclosure edge fold provides broad, secure contact with the seamless PU foam seal and helps preserve the protection category (up to IP 66) and protection class IK 10.

Extension accessories

The optional perforated door strip with system punchings on a flexible 25 mm pitch pattern allows it to be extended quickly and easily without machining the door. Its compatibility with Rittal system accessories makes this possible.

Easy assembly

Tool-free door assembly saves even more time. Once the door has been positioned, the hinge pin simply needs to be pressed in to complete the process.

Ease of assembly and attachment of the mounting plate

The mounting plate is easy to pre-attach and secure firmly in place simply by inserting it from above. The printed pitch pattern provided as standard makes component assembly easier.

Straightforward earthing

The machined keyhole makes it much easier to earth the mounting plate with automatic potential equalisation and this can even be done after the mounting plate has been screwed into place.

Robust material
Stainless steel enclosures in 1.4301 and 1.4404 are exceptionally robust and corrosion-resistant. The smooth surface can be cleaned quickly and easily.

Simple machining and protection during transportation
The laser-resistant protective film applied as standard prevents the enclosure from becoming scratched during machining and subsequent transportation.

Easy wall-mounting
Preparing to mount the wall bracket is now much easier, thanks to the rear panel embossing with punch points.

Compact enclosures AX

Basic enclosure AX, stainless steel

System accessories Page 24

Material:

- Enclosure: Stainless steel
- Door: Stainless steel, all-round foamed-in PU seal
- Mounting plate: Sheet steel
- Lock: Die-cast zinc, nickel-plated, double-bit insert die-cast zinc

Surface finish:

- Enclosure and door: Brushed, grain size 400
- Mounting plate: Zinc-plated

Supply includes:

- Enclosure with door(s)
 - Mounting plate
 - Lock: 3 mm double-bit
- Please note the product-specific scope of supply.

Approvals:

- UL
 - cUL
- Further approvals can be found on the Internet.

Small enclosures KX

Stainless steel

At the heart of challenging industrial installations and harsh environments, the KX stainless steel enclosure combines unrivalled quality with exceptional reliability. In a world where protection and safety are paramount, the KX stainless steel enclosure is your trusted partner. Precision-manufactured from high-end materials, these small enclosures will withstand even the toughest conditions, whether industrial installations or challenging environments. The innovative design and first-class stainless steel material creates an enclosure that is not just robust but also exceptionally long-lasting.

This brochure will guide you through the key features that set the KX stainless steel enclosure apart, from the optimised quick-release fastener with Torx insert for terminal boxes and bus enclosures, to simplified earthing and 180° door hinging.

Discover how the KX stainless steel enclosure delivers reliable performance and remarkable versatility in even the most challenging situations.

Terminal box KX

- Quick-release fastener including Torx insert
- Rear panel embossing: Wall bracket
- Earthing: Optimised perforated mounting strip
- Interior installation: Support rails, mounting plate, mounting claw

E-Box KX

- Cam lock
- Rear panel embossing: Wall bracket
- Earthing: Optimised perforated mounting strip
- 180° hinges as standard

Bus enclosures KX

- Quick-release fastener including Torx insert
- Rear panel embossing: Wall bracket
- Earthing: Optimised perforated mounting strip
- Interior installation: Support rails, mounting plate, mounting claw
- Hinges 180° as standard

**Terminal box KX, bus enclosure KX:
Precision**

The quick-release fastener with Torx insert is quickly and easily fitted, for tight all-round sealing of the lid against the enclosure.

E-Box KX: Clearance

The 180° door hinges create more space and improve access to the enclosure interior.

**Terminal box KX, bus enclosure KX,
E-Box KX: Secure earthing**

Optimised side elements for the PE conductor connection ensure super-fast, user-friendly earthing, even retrospectively.

Bus enclosure KX: Access

The wide door opening angle of up to 180° gives you plenty of space to fit and replace modules quickly and easily.

Bus enclosure KX, terminal box KX: Space maximisation

The support rails can optionally be fitted on the front of the integrated perforated mounting strip or, to maximise the enclosure depth, directly onto the rear wall of the rack.

Terminal box KX, bus enclosure KX, E-Box KX: Easy wall-mounting

Preparing to mount the wall bracket is now much easier, thanks to the rear panel embossing with punch points.

E-Box KX: Reliability

The cam lock with double-bit insert is fitted without tools. It securely locks the enclosure and can also be incorporated into custom locking systems.

Terminal boxes KX, stainless steel

System accessories Page 24

Material:

- Enclosures: Stainless steel 1.4301 (AISI 304)
- Cover: Stainless steel 1.4301 (AISI 304), all-round foamed-in PU seal

Surface finish:

- Enclosure and cover: Brushed, grain size 180

Protection category IP to IEC 60 529:

- IP 66

Protection category NEMA:

- NEMA 4X

Supply includes:

- Enclosure with cover
- Quick-release fasteners with Torx insert

Approvals:

- UL
- cUL

Further approvals can be found on the Internet.

Base

Pressure relief stopper

Especially when enclosures are exposed to changing climatic conditions, pressure differences may cause condensation to form in sealed enclosures. The integral sealing membrane in the pressure relief stopper largely prevents such pressure differences and hence eliminates condensation; additionally, it also prevents the ingress of moisture from the outside. Installed in vertical surfaces to protect against dirt.

Technical specifications:

- Air permeability up to 120 litres/hour with a pressure difference of 70 mbar
- Connection thread M12 x 1.5
- For fitting in wall thicknesses up to 4 mm

Packs of	Model No.
5 pc(s).	2459.500

Material:

- Polyamide

Colour:

- Similar to RAL 9005

Protection category IP to IEC 60 529:

- IP 68

Protection category IP to DIN 40 040-9:

- IP 69K

Supply includes:

- Lock nut

Pressure relief stopper, stainless steel

Especially when enclosures are exposed to changing climatic conditions, pressure differences may cause condensation to form in sealed enclosures. The integral sealing membrane in the pressure relief stopper largely prevents such pressure differences and hence eliminates condensation; additionally, it also prevents the ingress of moisture from the outside. Installed in vertical surfaces to protect against dirt.

Technical specifications:

- Length 10 mm
- Connection thread M12 x 1.5
- Air permeability up to 60 litres/hour with a pressure difference of 70 mbar

Material:

- Stainless steel 1.4301 (AISI 304)

Type rating to UL 50E:

- Type 4X
- Type 13

IP protection category to IEC 60 529

- IP 66
- IP X8
- IP X9

Supply includes:

- Lock nut

Packs of	Model No.
5 pc(s).	4000.300

Condensate discharge

For reliable condensate discharge from the inside and protection against splashed water from the outside (labyrinth effect). A hole diameter of 16 mm is required.

Material:

- Polyamide

Colour:

- Similar to RAL 7035

Protection category:

- Protection from splashed water, when correctly installed at the bottom

Note:

- Additional holes required in the enclosure

Packs of	Model No.
6 pc(s).	2459.000

System accessories AX, KX

Baying/Hinges

Baying kit

for AX, KX

For baying AX/KX enclosures. The additional cut-outs are to be provided by the customer.

Special screws and nuts

- For fast, simple assembly without thread-tapping
- Compression of the seal is limited to a predefined level, to ensure a long-lasting, permanent seal between enclosures

Seal, self-adhesive

- Comprised of bayable sealing elements and corner pieces, for individual adaptation to various enclosure sizes

One pack is sufficient for a baying point up to H x D = 800 x 350 mm.

Packs of	Model No.
1 pc(s).	1199.100

Supply includes:

- Special screws and nuts
- Sealing elements, self-adhesive

Cover hinge

for terminal boxes KX, stainless steel

The cover hinge is simply screw-fastened to the enclosure protection channel and to the edge fold.

Supply includes:

- Assembly parts

Material	Packs of	Model No.
Stainless steel 1.4404 (AISI 316L)	2 pc(s).	1592.010

System accessories AX

Lock system

Comfort handle AX

for compact enclosures AX with 3-point lock system

Prepared for the installation of lock inserts or for the installation of standard commercially available 40 or 45 mm profile half-cylinders, as well as lock and push-button inserts. The unlatched handle folds out forwards, and swivels to open the lock.

Material:

- Precision-cast stainless steel

Wall mounting/Interior installation

Pole clamp

for AX, KX

For reliable, convenient fastening to round or square poles.

For pole diameter / size:

- Ø from 40 to 170 mm
- □ from 50 to 150 mm

Material:

- Mounting angles, clamping section: Sheet steel
- Clamping strap: Stainless steel 1.4301 (AISI 304)

Surface finish:

- Mounting angle, clamping section: Zinc-plated

Supply includes:

- 2 mounting angles, 600 mm long
- 4 clamping sections
- 2 clamping straps
- 4 clamping brackets
- 4 self-tapping M10 bolts for mounting onto the enclosure

Packs of	Model No.
2 pc(s).	2584.100

Mounting plates

for terminal boxes KX, bus enclosures KX

For component installation outside of the enclosure. Assembly screws included as accessories with the enclosure.

Material:

- Sheet steel, 2 mm

Surface finish:

- Zinc-plated

Accessories:

- Self-tapping screws 2487.000, see page 41

Possible alternative:

- Support rails, see page 39

Interior installation

Rail for interior installation AX

For mounting in the enclosure, no machining required.

Variable with 2 rows of system punchings, creates additional mounting space e.g. for:

- Enclosure lights
- Door-operated switch
- Door stay
- Punched sections with mounting flanges, 14 x 39 mm
- Punched sections with mounting flanges, 23 x 64 mm
- Cable conduit holder
- Cable clamp rails
- Support rails

Benefits:

- Increased load-bearing capacity
- Stable mounting of the rail inside the enclosure
- Including adaptor for door-operated switch
- Compatible with VX25 accessories in conjunction with AX base configuration rail
- Enclosure protection category is retained (no machining required)
- Automatic potential equalisation
- May be retro-fitted even with the mounting plate in situ

Material:

- Sheet steel

Surface finish:

- Zinc-plated

For enclosure depth mm	Packs of	Model No.

Accessories:

- Screws, see Catalogue 36, page 1004
- Cable ties 2597.000, see Catalogue 36, page 1061

System accessories AX, KX

Rail systems

Base configuration rail AX

For installation in AX enclosures in combination with the AX interior installation rail.

- For the installation of VX accessories such as:
- VX support rail, 48 x 26 mm
 - VX cable clamp rail
 - VX punched section with mounting flange, 23 x 64 mm

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Punched section with mounting flange, 23 x 64 mm

For variable, individual interior installation. Simply secure to the interior installation rail above the base configuration rail in the AX. System punchings on all four sides. With slots at the top and bottom for cage nuts, for attaching your own components via metric screws.

Installation options:

- In the width and height of the AX in conjunction with the AX interior installation rail and AX base configuration rail

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Support rail 48 x 26 mm

For heavy installed equipment such as transformers. T-head screw and slots in the support rail accommodate all mounting dimensions.

Installation options:

- In the width of the AX in conjunction with the AX interior installation rail and AX base configuration rail

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Rail systems/assembly components

Mounting claw for second mounting level

for terminal boxes KX, bus enclosures KX

For fixing top hat rails directly onto the rear panel of KX terminal boxes and KX bus enclosures. Creates an additional mounting level with an extra 10 mm of installation depth without having to machine the enclosure.

Packs of	Model No.
20 pc(s).	2309.100

Accessories:

- Support rails TH 35/7.5 to EN 60 715, see page 39

Mounting clip

for support rails

For fast, secure attachment of:

- Cable ducts
 - Mounting plates
 - Mounting angles
- on support rail TH 35/7.5 and 35/15 to EN 60 715. Simply pre-assemble the mounting clip on the part to be installed, then snap into position on the support rail.

Packs of	Model No.
30 pc(s).	2309.000

Mounting bracket

Installation options:

- On all enclosures and mounting parts with system punchings on a 25 mm pitch pattern

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly screws

Packs of	Model No.
4 pc(s).	4597.000

Accessories:

- Screws, see page 41
- Cable ties 2597.000, see Catalogue 36, page 1061

Mounting bracket

for interior installation

In conjunction with the rail for interior installation, the mounting bracket allows the LED system light to be fitted without machining and without the use of tools.

Material:

- Sheet steel

Surface finish:

- Zinc-plated

Supply includes:

- Assembly parts

Packs of	Model No.
4 pc(s).	6205.100

Also required:

- Rail for interior installation AX 2394.XXX, see page 34

System accessories AX, KX

Assembly components

Rail mounting bracket

For individual mounting of rails at a distance from the mounting surface.

Cable gland

Sealing frame, modular

For universal use on all surfaces and walls, for inserting pre-assembled cables with connectors. Can also be mounted onto 24-pole or 16-pole connector cut-outs.

Material:

– Plastic

Colour:

– Black

Protection category IP to IEC 60 529:

– IP 66

Supply includes:

– Sealing frame
– Locking frame

Number of small seal inserts	For cut-out mm	Model No.
10	113.5 x 46 (24-pole)	2583.100
8	91 x 46 (16-pole)	2583.080

Also required:

- Inlay for plastic gland plates, modular and sealing frame, modular, see page 45
- Seal inserts for cable gland plates, modular and sealing frame, modular, see page 45

Inlay

for plastic gland plate, modular and sealing frame, modular

Individual inserts to subdivide the cut-outs in the modular plastic gland plate and the modular sealing frame.

Material:

– Plastic

Colour:

– Black

LED system light

Accessories

Connection accessories

for LED system light

The following components can be used for time-saving, easy installation of the lights:

+ Accessories:

- Cable ties 2597.000

Connection cable for	UL	Length mm	Packs of	Model No. orange
[1] Infeed, 2-pole, 100 – 240 V AC	■	3000	1 pc(s).	2500.520
[1] Infeed, 2-pole, 100 – 240 V AC	-	3000	5 pc(s).	2500.420
[2] Through-wiring, 2-pole, 100 – 240 V AC	■	1000	1 pc(s).	2500.550
[2] Through-wiring, 2-pole, 100 – 240 V AC	-	1000	5 pc(s).	2500.450

- A** Connection cable for infeed
- B** Connection cable for through-wiring
- C** Door-operated switch with connection cable (not required for LED system light with integral motion sensor)

Door-operated switch

with connection cable for LED system light

Supply includes:

- Assembly parts

	ENEC	UL	Length mm	To fit	Packs of	Model No. black
Connection cable	■	-	800	230 V AC/24 V DC, 1 A	1 pc(s).	2500.460
	-	■	800		1 pc(s).	2500.470

Technical information

Outdoor use of enclosures

In order to guarantee satisfactory long-term function of enclosures in outdoor use, the relevant environmental factors must be taken into account.

These include:

- UV radiation, the corrosive action of air pollution, rain, icing, snow, wind or other factors in special climatic conditions.

Condensation inside the enclosure

Condensation must be prevented by means of appropriate measures, e.g. by venting or heating the enclosure.

Protection category

The enclosure may be exposed to extreme weather conditions during outdoor use.

Long periods of rain, snow, ice, high winds and temperature fluctuations place particularly high demands on the enclosure sealing. The protection category IP X3 as envisaged for external weather conditions in DIN VDE 0100, part 737, point 5.2 is often insufficient to provide permanent protection for electrical equipment.

Suitable applications for each enclosure type are described in the relevant instructions.

Protection categories to IEC 60 529 (EN 60 529)

The IP protection category is characterised by 2 numerals.

Example of a protection category, e.g. IP 43:

Code letters	
IP	
First numeral	Second numeral
4	3

Degrees of protection for protection against contact and foreign bodies: First numeral			Degrees of protection for protection against water: Second numeral		
First numeral	Degree of protection Designation	Explanation	Second numeral	Degree of protection Designation	Explanation
1	Protected against solid foreign objects with a diameter of 50 mm and greater	The object probe, a sphere 50 mm in diameter, must not penetrate fully. ¹⁾	1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects.
2	Protected against solid foreign objects with a diameter of 12.5 mm and greater	The object probe, a sphere 12.5 mm in diameter, must not penetrate fully. ¹⁾ The articulated test finger may penetrate up to its length of 80 mm, but adequate distance from hazardous parts must be adhered to.	2	Protected against vertically falling water drops when the enclosure is tilted up to 15°	Vertically falling drops shall not have any harmful effects when the enclosure is tilted up to 15° on either side of the vertical.
3	Protected against solid foreign objects with a diameter of 2.5 mm and greater	The object probe, a sphere 2.5 mm in diameter, must not penetrate at all ¹⁾ .	3	Protected against sprayed water	Water sprayed at an angle of up to 60° on either side of the vertical shall have no harmful effects.
4	Protected against solid foreign objects with a diameter of 1.0 mm and greater	The object probe, a sphere 1.0 mm in diameter, must not penetrate at all ¹⁾ .	4	Protected against splashed water	Water splashed on the enclosure from any direction shall have no harmful effects.
5	Dust-protected	The ingress of dust is not fully prevented, but dust shall not enter to such an extent as to impair satisfactory operation of the device or safety.	5	Protected against water jets	Water directed at the enclosure from any direction in a jet shall have no harmful effects.
6	Dust-tight	No ingress of dust at a partial vacuum of 20 mbar inside the enclosure.	6	Protected against powerful water jets	Water directed at the enclosure from every direction in a powerful jet shall have no harmful effects.
			7	Protected against temporary immersion in water	Water must not ingress to such an extent as to cause harmful effects when the enclosure is temporarily immersed in water under standardised pressure and time conditions.
			8	Protected against continuous immersion in water	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions to be agreed between the manufacturer and the user. However, the conditions must be more difficult than for numeral 7.
			9	Protected against high-pressure and high-temperature water jets	Water projected at high pressure and high temperature against the enclosure from any direction shall not have harmful effects.

¹⁾ The full diameter of the object probe must not pass through an opening of the enclosure.

NEMA

The **N**ational **E**lectrical **M**anufacturers **A**ssociation (NEMA) is a standards organisation in Washington, USA, which publishes a number of technical standards but does not test or certify products itself.

The following NEMA classification outlines the protection of individuals from accidental contact with equipment and the protection of an enclosure from external factors.

Further information on protection categories may be found on the Internet at: www.rittal.com

UL/NEMA Type	Intended use and description
1	Enclosures for use predominantly indoors Protection against the penetration of foreign bodies
3	Enclosures for use predominantly outdoors Protection from rain, hail, dust, icing and the damage caused by icing
3R	Enclosures for use predominantly outdoors Protection from rain, hail, icing and the damage caused by icing
3S	Enclosures for use predominantly outdoors Protection from rain, hail and dust External mechanisms remain usable despite being coated in ice
4	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure
4X	Enclosures for indoor or outdoor use Protection against rain, foreign bodies, splashed water and hosed water and against damage caused by icing on the exterior of the enclosure Increased protection from corrosion
12, 12K	Enclosures for use predominantly indoors Protection against dust deposits, foreign bodies and non-corrosive dripping liquids
13	Enclosures for use predominantly indoors Protection against dust deposits, sprayed water, oil, and non-corrosive refrigerants

The UL/NEMA classifications are not directly comparable with IP protection categories, since both the test conditions and the evaluation of the test results are different

Approvals and permits

Product certifications and approvals are pivotal to the global acceptance of industrial products.

Rittal products meet the highest internationally recognised quality yardsticks. All components are subjected to the most stringent testing in accordance with international standards and regulations.

The consistently high product quality is ensured by a comprehensive quality management system. Regular production inspections by external test institutes also guarantee compliance with global standards

A precise allocation of products to marks of conformity can be found on our product and service pages on the Internet at www.rittal.com

PE conductor connection

The PE conductor connection must be designed by the manufacturer of switchgear in accordance with the relevant VDE and/or local regulations.

The enclosure packs generally contain earthing materials (screws, nuts, washers). The assembly instructions contain recommendations on installing a PE conductor.

The pre-assembled earth straps, available as accessories in various cross-sections and lengths, are intended to make assembly of a PE conductor easier.

Further information can be found in our technical documentation "PE conductor connection, current carrying capacity".

Suitable applications for each enclosure type are described in the relevant instructions.
